

QUALITY SHORT-TERM SKILLED NURSING at Signature Pointe

Consistent Nurse Staffing

Signature Pointe: 100% Texas Average: 95.1%

Percentage of days where federal standards for registered nurse staffing hours were met. Adequate staffing is associated with better safety and outcomes.

Emergency-Room Visits

Signature Pointe: 5.6% Texas Average: 10.7%

Percent of patients who needed to go to an ER (ED) during their stay. Indicative of higher quality of care and attention to patient safety.

Patients Able To Return Home

Signature Pointe: 68.9% Texas Average: 46.2%

Percentage of patients who were discharged from the nursing home to their own home or residence, an indication of successful rehabilitation.

Patient-Centered Rehabilitation Therapy

Signature Pointe: 43% Texas Average: 38.7%

Percentage of patients who received more than the minimum amount of therapy indicated for their condition. This suggests that patients are receiving appropriate care.
